

Charters / School groups CHS2805

Africa is the best destination in the world for learners - why not bring a group of students to Africa on a school exchange?

We can arrange for groups to visit a remote school and really live the life of an African and experience teaching the African way. Once again, you are totally in control of the level of exposure, or adventure, you wish to offer your learners. The trip leaders and drivers live and work on the continent and have hands on experience. They have been to all the places many times, that you are likely to want to visit. They are African based and therefore they know what works!

We look forward in helping you plan an itinerary that will meet your expectations and allow you to see the Africa you want to experience
