Tuesday Serengeti National Park - Ngorongoro Crater

After breakfast you depart for Ngorongoro viewing game across the vast Serengeti plains, stopping off at Olduvai Gorge en route. The Gorge acquired its name from the Sansevieria bush that grows profusely in the area, named Olduvai by the Maasai. The Gorge is about 50km long and in some places around 90m deep and is found between the Crater and the Serengeti. It was first discovered by a German entomologist named Professor Kattwinkel, who instigated an expedition just before the First World War. Later, the exploration was continued by Dr Louis Leakey and his wife, who in 1959 found humanoid remains of Zinjanthropus, later renamed Australapithicus Boisei, an early form of man. You will have time to walk through the simple small museum at the gorge, where you can view copy displays of some of the finds as well as pictures of what life was like for the gorge's earliest inhabitants. After a picnic lunch you continue to your lodge, set high on the rim of Ngorongoro Crater.

Wednesday Ngorongoro Crater

A highlight awaits you this morning as you depart to explore what is commonly referred to as the World's largest wildlife zoo. After breakfast, you descend with a picnic lunch through the early morning mists and 2,000 feet into the crater. Ngorongoro Crater is the World's largest intact volcanic caldera and is also one of the World's seven natural wonders. Due to its size and diversity, the crater floor is comprised of several distinct areas, ranging from forest, swamps, lakes and springs, to open grassland and some sandy dunes. It's an awesome wildlife experience. You return to the lodge in the late afternoon.
